About GPD

GPD delivers performance through design of business initiatives. Century-old techniques for planning miss the mark badly. Many corporate initiatives fail. Especially important, complex ones.

Today's business environment is much too dynamic for planning by intuition. GPD business design experts bring rapid project planning and team building techniques backed by advanced visual modeling, simulation, and predictive analytics.

Markets

Organizations with complex team coordination needs, including Aerospace, Automotive, Software, Large Capital Projects, Financial Services and Managed Services.

Services

Transformation of organization practices for global complexity readiness.

Design of complex Initiatives for high performance, including corporate roadmaps, post-merger Integration, strategic rollouts, new product introduction, global teaming, and PMO transformation.

Ongoing Performance through project monitoring, forecasting, and re-design.

TeamPort™

GPD's proprietary TeamPort™ method and software tools rapidly model, prototype, and optimize business initiatives. GPD uses TeamPort™ software to accelerate and validate strategic planning, expose coordination needs, deepen organizational effectiveness, and drive value.
